SpectralWorks Ltd and Mestrelab Research SL announce mutual reseller agreement

The software companies SpectralWorks Ltd (SpectralWorks) and Mestrelab Research SL (Mestrelab) announced today that they have entered into a mutual reseller agreement. Under this agreement both parties will be able to promote the full suite of products available from each company.

John Moncur, CEO of SpectralWorks, said *"The Mnova NMR software suite and our RemoteAnalyzer® cross platform open access solution have been brought together to provide seamless integration of MS and NMR sample submission, tracking and data processing. This provides the analytical chemist with a consistent user interface which is independent of which instruments are being used and requires no specialist expertise"*.

Santiago Dominguez, CEO of Mestrelab Research, commented *"We are delighted to start our collaboration with SpectralWorks. With their capabilities for Open Access sample management and the reprocessing, analysis and reporting capabilities of Mnova, the scientist workflow when interacting with analytical instrumentation and data will be significantly simplified, which will deliver valuable gains in productivity and research acceleration"*.

About SpectralWorks Limited

SpectralWorks Limited (www.spectralworks.com) is a leading UK based software development company. They are dedicated to providing innovative solutions targeted for markets within the life sciences industry and have strong working relationships with a number of the major instrument manufacturers. Coupled with their collaborations within academia and industry, they have the right balance between scientific and software development expertise to provide the best scientific solutions for the end user. Their vendor neutral MS data processing software, AnalyzerPro® and their cross platform open access MS and NMR solution, RemoteAnalyzer®, are widely used in academia and industry. They provide highly respected consultancy services able to cover the complete software development cycle or specific steps within a project life cycle.

About Mestrelab Research S.L.

Mestrelab Research SL (<http://www.mestrelab.com>) is a Spanish company specialized in the development of state of the art software applications for handling of analytical chemistry data (NMR, LC/GC/MS). Mestrelab Research SL develops and commercializes Mnova, a World leading integrated software package for processing and advanced analysis of NMR and LC/GC/MS data with multivendor support and an extensive Worldwide user base. The company's mission is to develop software solutions which become the universal processing and analysis interface between analytical instrumentation and chemists.
